Education

Bachelors in Business Administration, Minor in Management Information Systems <i>University of Washington, Bothell, WA</i> - Relevant Classes: Data Structures & Algorithms 1-2, Cybersecurity, Digital Business Lab	April 2025 (Expected) GPA: 3.9
Associates in Business, Associates in Arts <i>Green River College, Auburn, WA</i> - Relevant Coursework: Business Statistics, Business Calculus.	January 2023 GPA: 3.8

Skills

Programming Languages/ Frameworks: Java, Python (For Data Analysis), JavaScript, SQL, React, Electron

Tools and Technologies: Azure DevOps, Microsoft Office Software, Slack / Teams

Soft Skills: Hands on Learner, Time Allocation, Critical Thinker, Business Oriented

Experience

Software Development Intern Mountlake Terrace, Washington <i>Mugg Dynamometers LLC</i> - Developed a desktop application integrating MCU connections & data visualization using <u>Electron</u> , <u>React</u> , <u>Node.js</u> . - Implemented serial communication protocols w/ encryption for data transmission between the app and STM32. - Designed a SQLite database schema with one-to-many relationships, along with various CRUD operations	May 2024 – Present
Teaching Assistant Bothell, Washington <i>University of Washington</i> - Assisted 5 economics / econometrics classes of 40 students each by providing support in assignments and grading.	January 2024 – June 2024
Data Management Intern Remote <i>Ascend Leadership</i> - Cleaned / analyzed an estimated 26,000 cells of diversity data on fortune 500 companies using Python <u>Pandas</u> . - Created a comprehensive dashboard in <u>Tableau</u> to explain our findings to non-technical stakeholders.	February 2024 – May 2024
Technology / Production Intern Remote <i>RSA Conference</i> - Collaborated as a Junior SWE to develop a custom information system, utilizing <u>C#</u> , <u>Blazor UI</u> , <u>DevExpress</u> & <u>.NET</u> . - Streamlined information from multiple data sources, improving operational efficiency by an estimated 15%. - Tailored the system based on stakeholder feedback to ensure alignment. - Automated data entry with a <u>Python</u> script, extracting over 64,000 cells of data, reducing time spent by 95%.	June 2023 - August 2023

Projects

Exploring the Impact of Reddit Volume and Sentiment on Stock Prices. <i>Scholarship Project</i> - Extracted & cleaned 2,343,340 reddit comments from financial subreddits using <u>Dask</u> , <u>Pandas</u> & <u>Hugging Face</u> . - Conducted sentiment analysis using <u>DistilBERT</u> & created scripts to calculate daily mentions & sentiment scores. - Developed & tested various regression models to measure the influence of reddit metrics on stock prices. - Set to present research at the 2024 INFORMS annual meeting.	June 2024 - Present
End to End Data Engineering Project (Azure) <i>Personal Project</i> View Code Demo - Followed the <u>ELT</u> framework using a Kaggle dataset to ingest data into <u>Azure</u> and created a <u>PowerBI</u> dashboard. - Created a full end to end data pipeline using <u>Data Factory</u> , <u>Data Lake</u> , <u>Databricks</u> & <u>Synapse Analytics</u> .	February 2024
Personal Landing Page <i>Personal Project</i> View Code - Created a personal landing page using <u>Typescript</u> , <u>Tailwind</u> , <u>React</u> , & <u>AWS Route 53</u> , then deployed it with <u>Firebase</u> .	December 2023
Laptop Price Analysis <i>Personal Project</i> View Code - Developed a web scraper using Python's <u>BeautifulSoup</u> and <u>Selenium</u> , extracting over 40,000 cells of laptop data. - Cleaned the data using <u>Pandas</u> , resulting in 12,000 refined data points. - Conducted an <u>Exploratory Data Analysis</u> to visualize laptop trends over time.	November 2023
Decoding SaaS Stock Prices <i>Project Manager</i> Econometric Project - Led a team of two to by driving research, collecting / analyzing data, and delivering the presentation. - Analyzed 1600 cells of KPI data on 5 major U.S. SaaS companies using Multivariate Regression in <u>Stata</u> . - Revealed that R&D, Gross Profit Margin, and Earnings Per Share have the most impact on stock prices at a 95% confidence level.	May 2023
